

Lupus Education Is Critical

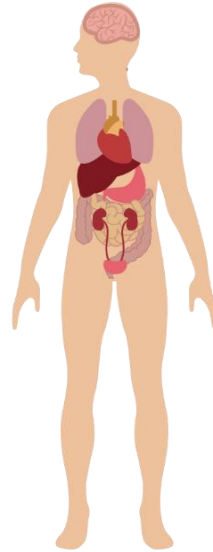

Lupus is a devastating autoimmune disease that is difficult to diagnose

Patients spend an average of **4 years**

See **3 physicians** before the disease is diagnosed

Can affect **11 organs** and potentially lead to irreversible damage

But it is NOT rare

Affects up to **1.5 Million** people across the U.S.

90% are women between the ages of 15-45

2-3 times more common in people of color
